

django offline 6 marks question practice

1. write a terminal command to start project named "store"

ans1: python -m django startproject store

2. write a terminal command to create "grocery" app in store project

ans2: python manage.py startapp grocery

3. write a models.py file code for add data of grocery..like item_name,price,category

ans:3

```
class Grocery(models.Model):  
  
    item_name=models.CharField(max_length=50)  
  
    category=models.CharField(max_length=50)  
  
    price=models.IntegerField()
```

4. write admin.py file code to register model

ans4:

```
from .models import Grocery  
  
admin.site.register(Grocery)
```

5. write terminal command to migrate model

ans5:

```
python manage.py makemigrations  
  
python manage.py migrate  
  
python manage.py createsuperuser  
  
python manage.py runserver
```

6. write views.py file code to render "home.html" file
and display all objects added in backend (no need to write html file code)

ans:6

```
from .models import Grocery  
  
def home(request):  
  
    gro=Grocery.objects.all()  
  
    return render(request,"home.html",{"gro":gro})
```
